## Forest Gardening In Practice An Illustrated Practical Guide for Homes, Communities & Enterprises by Tomas Remiarz

A forest garden is a place where nature and people meet halfway, between the canopy of trees and the soil underfoot. It doesn't have to look like a forest – what's important is that natural processes are allowed to unfold, to the benefit of plants, people and other creatures. The result is an edible ecosystem.

For three decades experimental forest gardens have been planted in temperate cities and rural sites, in households, neighbourhoods, community gardens, parks, market gardens and plant nurseries. *Forest Gardening In Practice* is the first indepth review of forest gardening with living, best practice examples. It highlights the four core skills of forest gardeners: ecology, horticulture, design, cooperation. It is for hobby gardeners, smallholders, community gardeners and landscape professionals.

*Forest Gardening In Practice* features:

- \* A history of forest gardening
- \* Step-by-step guide to creating your own edible ecosystem
- \* 14 in-depth case studies of established forest gardens and edible landscapes in Europe and the USA.
- \* Chapters on integrating animals, learning, enterprises, working in community and public settings.

### ABOUT THE AUTHOR:

Tomas Remiarz has been involved in creating and maintaining forest gardens across the UK and Europe for nearly 20 years. He is currently involved in a sustainable rural housing project project on a 7-acre site in Herefordshire. As a founder member of the Permaculture Association's research advisory board he is particularly interested in studying polycultures and has produced several reports on the subject.

Written by Tomas Remiarz, *Forest Gardening in Practice* is really a beautiful example of what a gardening book can and should be in an age when so much raw information is available to us at the touch of a button. Taking us through the inspirations behind temperate climate forest gardening—which include the "home gardens" of Kerala, India, as well as traditional English cottage gardening—Remiarz walks us through how the concept was developing in parallel in several different parts of the world. From the forest gardening of Robert Hart in the UK, to the development of permaculture by Bi International forest garden / food forest Symposium. Forest Gardening Seminar. Useful Information. Tours. It includes a really useful survey of cold-climate food forestry from Europe and the USA, with in-depth case studies bringing out the way people have solved (or not) problems encountered along the way. Forest Gardening in Practice quantity. Add to cart. SKU: PU-011 Categories: On Agroforestry, On Forest Gardening, Publications. Description. Description. In this valuable book Tomas Remiarz concentrates on the relationships of people with their forest gardens. It includes a really useful survey of cold-climate food forestry from Europe and the USA, with in-depth case studies bringing out the way Forest gardens or food forests come in all shapes and sizes, from a tiny patch in a back garden to sites of many acres. You can find them in peoples homes, on allotments, in schools, colleges, housing developments and public parks. They are also being used in commercial market gardens and on farms. I have created this website to share my enthusiasm for forest gardens and show how they could help us find better ways to look after ourselves and each other. Over the last four years I have researched over 100 forest gardens, from small back yards to commercial farms. They are illustrated with beautiful photographs and line drawings by Jed Picksley. *Forest Gardening in Practice* - Order here.
