These activities can showcase your soft skills and help recruiters gauge your professional aptitude. Each one of them should come with a few points that detail your responsibilities and accomplishments. Here's what you can include in your employment history section:

Part-time jobs. If you're fresh out of school (or still studying), part-time jobs are probably your primary type of experience. Even if the job isn't super-relevant to the job you're applying for now, there are valuable transferrable skills you've acquired in that job. Most employers today are interested in your recent employment history. I only list past ten years. Go to my blog for free, professional, applicable career advice. 7.4k views · View 5 Upvoters. If you mean looking up your taxation history within employment, I would suggest that you write to your equivalent of Inland Revenue, and they should be able to give you a list of employers for at least the last ten years; and there should be no charge! Your CV should carry all the jobs you have done, even if you only go back 10 years on your CV. How do I go about getting my employment history, for free, I need dates of my employment? I would like to get my records online if possible! Thank you. Just let me say that this encounter has been entirely professional and most helpful. I liked that I could ask additional questions and get answered in a very short turn around. Esther Woodstock, NY.
