

DUBAI

Dubai is the second largest of the seven emirates of the United Arab Emirates on the Persian Gulf. It has the largest number of population among them. Today, the economy of Dubai grows stronger because of its revenue from trading, financial services, tourism, construction, real estate and the hotel industry. The unique architecture such as the Palm Jumeirah or exotically expensive hotels like Burj al Arab draw tourists in droves to this Arab emirate. Not just this, the sun glazed Arabian Desert awaits you with its mesmeric sand dunes and beautiful sunsets. Dubai is a second name to opulence and extravagance, which is a must for any traveler looking to spend holidays in the Middle East.

Cultural History

Dubai is totally an Islamic country with deep rooted Islamic culture and traditions. At first there was a small fishing tribe living here and then the Maktoum family led Bani Yas tribe took over. Ever since then, the Maktoum family has been ruling this land. Even though it is an Islamic state, other religions are allowed to be practiced here and they also have their own religious temples. Dubai is largely populated by expatriates and less of the original populace. However, mosques and the Islamic call to prayer is a frequent reminder of its original heritage.
