One of the largest and most authoritative collections of online journals, books, and research resources, covering life, health, social, and physical sciences. Email or Customer ID. Please check your email for instructions on resetting your password. If you do not receive an email within 10 minutes, your email address may not be registered, and you may need to create a new Wiley Online Library account. Request Username. Can't sign in? Forgot your username? Enter your email address below and we will send you your username. Email or Customer ID. Close. Research within Questia's entire library of more than 83,000 full-text online books and more than 14 million academic journal, magazine and newspaper articles, and more, by research topic or by publication. There are two ways to browse our library collection: by topic or by publication type (books, journals, magazines, newspapers). By topic. The collection's 17 major categories lead to thousands of in-depth research topics. Each of those topics contains links to librarian-selected books and articles relevant to that topic. Topic categories. Publications (ISSN 2304-6775) is an international peer-reviewed open access journal on scholarly publishing published quarterly online by MDPI. Open Access - free for readers, free publication for well-prepared manuscripts submitted before 31 December 2020. Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 34 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the second half of 2019). Recognition of Reviewers: reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
