

A Handlist of Source Books on the History of Oceanography

Eric L. Mills

This is an updated version of a paper first published in *Earth Science History* 12 (1993), 2-4. The reference books and monographs following have been selected to aid teachers and beginning students of the history of oceanography. The list is based on two principles, either that the publications are readily available in major libraries, or that they have not been superseded as sources of information. The periodical literature is not included because of its extent. A good source of information on journal articles published between 1913 and 1975 is the *Isis* cumulative bibliography (ed. M. Whitrow and J. Neu); it is added to annually by the *Critical Bibliographies* accompanying the journal *Isis*.

1. Basic Texts

Deacon, Margaret. *Scientists and the Sea 1650-1900: A Study of Marine Science*. (Aldershot, Hampshire, Great Britain, Brookfield, Vermont: Ashgate, 2d ed., 1997), xl, 459.

McConnell, Anita. *No Sea Too Deep: The History of Oceanographic Instruments*. (Bristol: A. Hilger, 1982), ix + 162.

Mills, Eric L. *Biological Oceanography: An Early History, 1870-1960*. (Ithaca, NY: Cornell University Press, 1989), xviii, 378.

Schlee, Susan. *The Edge of an Unfamiliar World: A History of Oceanography*. (New York: E.P. Dutton, 1973), 398.

2. Symposium and Congress Proceedings

Colloque International sur l'histoire de la Biologie Marine. Les grandes Expéditions Scientifique et la Creation des Laboratoires Maritimes, Banyuls-sur-Mer, 2-6 Septembre 1963. 370 pp. *Vie et Milieu*, supplement 19 (1965).

Communications - Premier Congrès International d'histoire de l'Océanographie, Monaco. *Bulletin de l'Institut Océanographique*, Monaco, no. special 2, 3 (1966), xlii, 807.

Second International Congress on the History of Oceanography. Challenger Expedition Centenary; Edinburgh, September 12 to 20, 1972. *Proceedings-the Royal Society of Edinburgh, Section B (Biology)* 72, viii, 462; 73, viii, 435 (1972).

Welcome to The Internet History Sourcebooks Project, a collection of public domain and copy-permitted historical texts presented cleanly (without advertising or excessive layout) for educational use. Primary sources are available here primarily for use in high-school and university/college courses. From the outset the site took a very broad view of the sources that should be available to students and as well as documents long associated with a "western civilization" approach to history also provides much information on Byzantine, Islamic, Jewish, Indian, East Asian, and African histo... Historical sources are, at their most basic level, something that tells us about history. It may be a document, a picture, a sound recording, a book, a cinema film, a television program or an object. Any sort of artifact from the period in question that conveys information can qualify as a source. There are two main types of historical sources: primary sources and secondary sources. Loading Loading A primary source is something that originates from the past.Â A secondary source is a work that comments on the past. Typically this is a recently written book that describes past events, often written by a historian or trained scholar familiar about the time period and civilization in question. A secondary source is a book about history.
