Books and Book Chapters. Type General style notes. Book. Entry in reference list. Author. Book titles are italicised. Capitalisation - Capitalise only the first word of the title and of the subtitle, if any, and any proper nouns. Details about edition, volume number or chapter page range are placed in parentheses directly after the title, with the period after the parentheses, e.g., (2nd ed.). or (Rev. ed.). or (Vol. xvi). In the in-text citation, if pages are being directly referenced, include the page number/s after the year. Electronic Book. A chapter book or chapterbook is a story book intended for intermediate readers, generally age 7-10. Unlike picture books for beginning readers, a chapter book tells the story primarily through prose, rather than pictures. Unlike books for advanced readers, chapter books contain plentiful illustrations. The name refers to the fact that the stories are usually divided into short chapters, which provide readers with opportunities to stop and resume reading if their attention spans are not long enough to The templates for chapters in edited books are shown below, for print books, electronic books, and books with DOIs (either print or electronic), respectively: Author, A. A. (Year). Title of chapter. In B. B. Editor (Ed.), Title of book (pp. xxx-xxx). Location: Publisher. Author, A. A. (Year). Title of chapter. In B. B.
