Nick Cooney, *Veganomics: The Surprising Science on What Motivates Vegetarians, from the Breakfast Table to the Bedroom* (2014).  
D[edit]. Humanity faces some big challenges in the 21st century, and I'm glad the effective altruism movement exists to tackle them. It promises to shield our do-gooding from the temptations of faddish causes and poignant advertising. It promises an unsoppy, no-bullshit morality. The fact that it seems to require an astonishing degree of self-abnegation, foresight and mathematical ability does not faze the effective altruist any more than it did the Victorian utilitarian. *Veganomics* offers a fascinating look at the rise of vegetarianism, as well as intriguing insight into the hearts and minds of the compassionate people who choose to leave meat off their plates. You will be captivated and informed, but most importantly, inspired. A graduate of Hofstra University, Nick is the author of *Change Of Heart: What Psychology Can Teach Us About Spreading Social Change* (Lantern, 2011) and *Veganomics: The Surprising Science on What Motivates Vegetarians, from the Breakfast Table to the Bedroom* (Lantern, 2014). He has lectured across the U.S. and Europe on effective animal advocacy, and his work for farmed animals has been featured by hundreds of media outlets, including Time magazine, The Wall Street Journal, and National Public Radio.
