Table of Contents

<i>Preface</i>	<i>iii</i>
Chapter 1 Carbon	
Comparative Study of Using Chlorine and Hydrogen Chloride for Synthesis of Titanium Carbide Derived Carbon <i>I. Tallo, T. Thomberg, A. Jänes, E. Lust</i>	3
Diameter Dependent Doping of Single-Walled Carbon Nanotube Used as Electrical Double Layer Capacitor Electrode <i>A. Al-Zubaidi, Y. Ishii, T. Matsushita, S. Kawasaki</i>	13
Nitrogen Doped Graphene as a High Efficient Electrode for Next Generation Supercapacitors <i>V. Chabot, F. M. Hassan, A. Yu</i>	19
Dramatic Improvements in Electric Double-Layer Capacitors by Using Polysaccharides <i>M. Yamagata, S. Ikebe, Y. Kasai, K. Soeda, M. Ishikawa</i>	27
Three Dimensional Graphene-CNTs Foam Architectures for Electrochemical Capacitors <i>W. Wang, S. Guo, I. Ruiz, M. Ozkan, C. S. Ozkan</i>	37
Temperature effects in Activated Carbon Supercapacitors <i>D. W. Kirk, J. W. Graydon, S. Klas</i>	45
Gel-Based Activated Carbon Electrode For Supercapacitors <i>V. Jouille, C. Galindo, M. Paté, P. Le Barny, M. Pham Thi</i>	53

Chapter 2 Pseudocapacitance

Cathodic Synthesis of Birnessite Films for Pseudocapacitor Application <i>T. Tanimoto, H. Abe, K. Tomono, M. Nakayama</i>	61
Polyaniline-MnO ₂ Nanocomposite Supercapacitor Electrodes Prepared by Galvanic Pulse Polymerization <i>G. P. Pandey, A. C. Rastogi</i>	71
Polypyrrole-Covered MnO ₂ as Electrode Material for Hybrid Supercapacitor <i>A. Bahloul, B. Nessark, E. Briot, H. Groult, A. Mauger, C. M. Julien</i>	79
EQCM Investigation on Electrodeposition and Charge Storage Behavior of Birnessite-Type MnO ₂ <i>M. Shamoto, T. Tanimoto, K. Tomono, M. Nakayama</i>	85
Tuning Electrolytic Manganese Dioxide for a High-Voltage Aqueous Asymmetric Electrochemical Capacitor <i>C. J. Jafta, F. Nkosi, L. LeRoux, M. A. Kebede, K. Makgopa, M. K. Mathe, N. Manyala, M. Oyama, K. I. Ozoemena</i>	93
Electrochemical Properties of Electrochemical Capacitors Using NiO Electrode <i>M. Chiku, M. Toda, E. Higuchi, C. B. Tsai, P. C. Chen, W. H. Ho, H. Inoue</i>	103
Comparative Study of Electrode Stabilization Technique for Graphene-Polyaniline Nanocomposite Electrodes Using Dielectrics for Supercapacitor Applications <i>S. Ketkar, M. K. Ram, A. Kumar, T. Weller, A. M. Hoff</i>	111
Organic-Inorganic Hybrid Materials for Supercapacitors <i>V. Ruiz, J. Suarez-Guevara, P. Gomez-Romero</i>	117
Electrochemical Capacitors Based on Nitrogen-Enriched Cobalt (II) Phthalocyanine/Multi-walled Carbon Nanotube Nanocomposites <i>J. Lektima, K. I. Ozoemena, N. Kobayashi</i>	125

Chapter 3 Devices and Applications

Development and Evaluation of an Asymmetric Capacitor with a Nickel/Carbon Foam Positive Electrode <i>B. C. Cornilsen, J. Wang, P. Sasthan Kuttipillai, T. N. Rogers, W. N. Yeo, M. B. Chye, A. Singh Bhatia</i>	135
Polyacrylonitrile and 1-Ethyl-3-Methylimidazolium Thiocyanate Based Gel Polymer Electrolyte for Solid-State Supercapacitors with Graphene Electrodes <i>G. P. Pandey, A. C. Rastogi, C. R. Westgate</i>	145
Novel NaClO ₄ and NaPF ₆ Based Non-Aqueous Electrolytes for Electrical Double Layer Capacitor Application <i>A. Laheäär, A. Jänes, E. Lust</i>	153
Electrolytic Characteristics of Tetramethylammonium Compounds and Performance of Electric Double-Layer Capacitors Evaluated by Using Transmission-Line Model <i>N. Nambu, T. Satoh</i>	163
Advances in Solid Electrochemical Capacitors <i>K. Lian, H. Gao, H. Wu</i>	175
Specific Performance of Electrical Double-Layer Capacitors Based on Different Separator Materials and Non-Aqueous Electrolytes <i>K. Tönurist, T. Thomberg, A. Jänes, E. Lust</i>	181
Surface Characterization of Supercapacitor Electrodes after Long-Lasting Constant Current Tests <i>A. Jänes, J. Eskusson, R. Kanarbik, E. Lust</i>	191
Testing of MnO ₂ Aqueous Hybrid Supercapacitors under Extreme Climatic Conditions <i>A. J. Roberts, R. C. T. Slade</i>	199
Electrochemical Capacitor Usable Power for Hybrid Electric Vehicle Applications as Determined from Transient Electrical Response <i>D. A. Corrigan, C. Fortin, A. Zabik</i>	211
Thermodynamics in Porous Electrodes: A Monte Carlo Simulation Study <i>K. Kiyohara, K. Asaka</i>	223

Development of Solid-State Photo-Supercapacitor by Coupling Dye-Sensitized Solar Cell Utilizing Conducting Polymer Charge Relay with Proton-Conducting Membrane Based Electrochemical Capacitor	235
<i>P. J. Kulesza, M. Skunik-Nuckowska, K. Grzejszczyk, N. Vlachopoulos, L. Yang, L. Häggman, A. Hagfeldt</i>	
Influence of Yttrium Addition on the High Capacitance of ZrO ₂ -SiO ₂ Nanocomposite Anodic Oxide Films	245
<i>M. Ishizuka, E. Tsuji, Y. Aoki, A. Hyono, T. Ohtsuka, N. Sakaguchi, S. Nagata, H. Habazaki</i>	
Author Index	255

Electrochemical Capacitors Scientific Fundamentals and Technological Applications. NewYork. Kluwer Academic/Plenum Publishers.
[Pg.644].Â For electrochemical capacitors of the system carbon-carbon, in spite of the fact that the electrode body consists of
conductive activated carbon, it is always necessary to use highly conductive additives, preferably those selected from the group of carbon
materials.
