Maintenance Planning and Scheduling is a key component in delivering maintenance services effectively and efficiently. After leaving the maintenance manager roll in an industrial process chemical manufacturer in 2005 I started presenting maintenance planning and scheduling training courses around Australia and Asia. The course I present is designed and built from a business owner's point of view. Doing maintenance planning and scheduling is important. But the incredible difference to a company comes from what is done when you do the planning. The secret is knowing how to plan and prepare maintenance work so that it creates world class reliability.
