Reading comprehension involves three distinct components: processing text (sounding out the syllables to decode the words), understanding what was read, and making connections between the text and what you already know. Vocabulary Knowledge vs. Text Comprehension. Vocabulary knowledge and text comprehension are two vital elements of reading comprehension. Vocabulary knowledge refers to understanding individual words. If a reader doesn't understand the words he is reading, he won't understand the text as a whole. Then sharpen your skills with Common Core aligned multiple-choice and long-response questions. Reading comprehension is one of the pillars of the act of reading. When a person reads a text he engages in a complex array of cognitive processes. He is simultaneously using his awareness and understanding of phonemes (individual sound "pieces" in language), phonics (connection between letters and sounds and the relationship between sounds, letters and words) and ability to comprehend or construct meaning from the text. This last component of the act of reading is reading comprehension. It cannot occur independent of the other two elements of the process. In order to understand a text the reader must be able to comprehend the vocabulary used in the piece of writing. If the individual words don't make the sense then the overall story will not either.
