SCRIPPS INSTITUTION OF OCEANOGRAPHY ARCHIVES

Bradner, Hugh 1915-2008

Hugh Bradner Papers, 1938-1981

BULK DATES: 1938-1973

PHYSICAL DESCRIPTION: 9 record center cartons

ARRANGEMENT: student notes, 1930's-1940's; old correspondence, 1940-1960; laboratory notebooks, 1960-1970; lecture notes, 1970-74; appointment calendars, 1970-1980; chronological files, 1960-1973; alphabetical subject files, 1970-73.

DESCRIPTION: The collection includes correspondence, memoranda, student notes, lecture notes, research notes, appointment calendars, speeches, committee files and other papers documenting the career and life of Hugh Bradner during the period 1938-1981. The collection includes the following series: student notes, 1930's-1940's; old correspondence, 1940-1960; laboratory notebooks, 1960-1970; lecture notes, 1970-74; appointment calendars, 1970-1980; chronological files, 1960-1973; alphabetical subject files, 1970-73. The collection also includes files on Brobeck, General Atomic, MACI, MACII, Miami University, Monopoles, NRI and Physics.

The collection is particularly strong in correspondence and other material documenting Bradner's work on diving, diving instrumentation and the physiology of divers. This material is largely contained in correspondence dated 1942-1960. The collection contains very little material documenting Bradner's work at the Lawrence Lab at Berkeley; Bradner discarded his papers documenting his career at Berkeley.

Ten items of correspondence and memoranda concerning the design of the wet suit were sent to the Archives by Bradner in August, 1975. These were reintegrated into the Diving Correspondence series of the Bradner Papers.

BOX FOLDER TITLE**STUDENT NOTES**

- 1 Physics, 1st term 1937-38, Atomic Physics, Millikan
- Physics, Electro-Magnetism I, 1st term 1937-38, Smythe

 "Inertial Navigation without Gyros," American Journal of Physics, 1968
 "Our Nation and the Sea," Bulletin of the Atomic Scientist, 1969
 "Physicist Looks at Oceanography," 1970-1971
 "Temperature Dependence of Conical Features in Glass," 1970
 Underwater Diving Symposium, April 10-11, 1970

BOX FOLDER TITLE**LECTURES, SPEECHES, RESEARCH NOTES AND OTHER PAPERS**

- 9 "Microseism Propagation via Oceanic Waveguide," Submitted to Pure and Applied Geophysics, c1971.
- Neutrino and Geothermal Fluxes II, 1972
- "Some Methods for Determining Acceleration and Tilt by Use of Pendulums and Accelerometers," submitted to Bulletin of the Seismology Society of America, February 15, 1972
- "Prograde Rayleigh Waves and Microseism Sources," submitted to J. Geophys. Research, April 4, 1972
- "A Note on Zero Length Springs," American Journal of Physics, July, 1972
- Overpressures, [Paper, "A Rough Hazard Chart for Sub-Marines in Earthquake Zones," 1972-1974
- [New Method for Inertial Guidance," 1973]
- Journal of Geophysical Research, Applied Mechanics Reviews, IEEE, Reviews, 1974-1979
- [Lecture Notes] Savage, Dislocation Theory, 1975, pp. 1-50
 pp. 51-105
 Bibliography and Figures
- Brune, Seismic Interpretation, 1975
- AGU, Paper on Development of Ocean Bottom Seismometers, Fall, 1976
- [Address Books, n.d.]
- [Appointment Calendar, 1946]
- [Appointment Calendar, 1970]
- [Appointment Calendars, 1972-1973]
- [Appointment Calendars, 1974-1975]
- [Appointment Calendars, 1976-1977]
- [Appointment Calendars, 1978-1979]
- [Appointment Calendars, 1980-1981]

Scripps Institution of Oceanography condemns racism, racist acts, the systemic forces that allow and foster them, and the inequalities with which our country still struggles. Black lives matter, and we stand in support and solidarity with our Black community. We know there are issues of systemic racism in academia and geosciences, and are committed to making sure everyone feels that they belong, they matter, and they can succeed at our institution. Hugh Bradner (November 5, 1915 – May 5, 2008) was an American physicist at the University of California who is credited with inventing the neoprene wetsuit, which helped to revolutionize scuba diving. A graduate of Ohio's Miami University, he received his doctorate from California Institute of Technology in Pasadena, California, in 1941. He worked at the US Naval Ordnance Laboratory during World War II, where he researched naval mines. In 1943, he was recruited by Robert Oppenheimer to join the Manhattan Project at the Los Alamos Laboratory. There, he worked with scientists including Luis H. Bradner's 43 research works with 356 citations and 679 reads, including: A Search for Very High Energy Neutrinos from Active Galactic Nuclei. H. Bradner's research while affiliated with The Scripps Research Institute and other places. Overview. Publications (43). A Search for Very High Energy Neutrinos from Active Galactic Nuclei. Article. Full-text available. Jun 1997.
