- WALTON, Whitney** *Internationalism, National Identities, and Study Abroad* reviewed by Nicole Rudolph (Vol. 30, No. 3, 141)

The surface-area-to-volume ratio, also called the surface-to-volume ratio and variously denoted sa/vol or $SA:V$, is the amount of surface area per unit volume of an object or collection of objects. In chemical reactions involving a solid material, the surface area to volume ratio is an important factor for the reactivity, that is, the rate at which the chemical reaction will proceed.
